

Maintrac Circulating Tumor Cell Count Instructions

Updated Apr 14, 2024

These instructions are for **existing patients** who are not close to our office, and who wish to have blood drawn close to home for the Maintrac blood test.

If you are not currently a patient of Medicor / Sano Via Wellness, please download the correct instructions that apply to you.

Every step is mandatory, failure to follow the exact procedure will delay your testing:

1. Download and read the [Maintrac Patient Information](#) handout.
2. Download and complete the [Maintrac Checklist and Consent](#). If the checklist confirms the test is suitable for you at this time, proceed with the next steps.
3. Purchase the [Maintrac test kit](#) on our online store.
4. Return **all** completed forms **together** by email to info@medicorcancer.com or by fax to 416-227-1915. Incomplete forms will delay your testing.
5. Once we have all the completed forms, they will be reviewed by our practitioner and a test kit will be mailed promptly.
6. Have your blood drawn according to the instructions in the kit. For accurate results, it is very important that a discard tube be used for the first blood sample.
7. Pack and send your blood sample to the lab according to the instructions in the kit, using the shipping label provided.
8. We will contact you within a short time after we receive the test result. You will receive the test report and a handout that explains the interpretation of the result.

Thank you for using Maintrac CTC testing!
